hit the ground running

HGR is a three-week summer learning program for new S&T students.

Hit the Ground Running (HGR) offers new students an exciting perspective on learning that will sharpen and enhance their academic skills.

HGR is an excellent way for new S&T students to learn about coursework expectations, campus life and community involvement. Participating students take courses in chemistry, math and English for a 3-hour course credit; learn about research and leadership opportunities; and participate in team building activities and field trips.

Participate in HGR and develop your leadership and communication skills, make new friends and master constructive strategies for succeeding academically at Missouri S&T.

Unlock your potential
Dynamic team activities will help YOU navigate your freshman year at Missouri S&T:
- Utilize S&T's academic assistance resources
- Learn from student mentors
- Get involved in campus activities
- Explore undergraduate research opportunities

Get a head start on college
- Take courses in chemistry, math and English taught by a team of S&T’s most exceptional educators and professors
- Learn helpful study techniques
- Explore the relationship between science, discovery, research and everyday life
- Practice your writing skills

Have fun!
